Ensuring the Healthy Future of Our Waters

Nine miles. That's how close to Lake Michigan the live silver carp caught on June 22, 2017 was. **We can't wait any longer.**

And we don't have to. The **Stop Asian Carp Now Act** would require the Trump Administration to release the Brandon Road Study, the report that details how best to prevent the spread of Asian carp.

Please take **just one minute** to visit our website, where we've made it easy for you to tell Congress to support the **Stop Asian Carp Now Act**.

Together, we can **prevent a large scale invasion** of the Great Lakes and **protect the waters** we all rely on for drinking water, recreation, and economic stability.
